CONTENTS OF VOLUME XXII

CXVIII. JANUARY, 1906

Infra-red Emission Spectra. WILLIAM W. COBLENTZ 1
The Equal Arm Balance. H. V. CARPENTER AND ZELLA E. BISBEE 31
American Physical Society. The Conductivity of the Air Due to the Sulphate of Quinine, *Fanny Cook Gates;* Electrolytic Mercurous Sulphate as Depolarizer for Standard Cells, *George A. Hulett* 45
New Books: *Bucherer:* Mathematische Einführung in die Electronentheorie; *Chwolson:* Lehrbuch der Physik; *Freund:* The Study of Chemical Composition; *Hagenbach and Konen:* Atlas of Emission Spectra; *Travers:* Experimentelle Untersuchung von Gasen; *Boyd:* Differential Equations, a short course for engineering students; *Zeidler:* Die elektrischen Bogenlampen; *Collins:* Wireless Telegraphy 52

CXIX. FEBRUARY, 1906

The Capacity of Mica Condensers. ANTHONY ZELENY 65
American Physical Society. Minutes of the Thirtieth Meeting; Presidential Address, "Condensation Nuclei," *Carl Barus;* The Electrical Production of Ozone, *A. W. Ewell;* The Absorption of Alpha Rays in Gases and Vapors, *E. P. Adams;* Differential Temperature Records in Meteorological Work, *C. H. McLeod and H. T. Barnes;* The Relative Conductivities Imparted to a Flame of Illuminating Gas by the Vapors of the Salts of the Alkali Metals, *F. L. Tufts;* The Optical Properties of Exceedingly Thin Films, *Wm. B. Cartmel;* On the Velocity of Sound in Gases at Low Temperatures and the Ratio of the Specific Heats, *S. R. Cook;* A New Determination of the E.M.F. of the Clark and Cadmium Standard Cells by Means of an Absolute Electrodynamometer, *K. E. Guthe;* Experiments on Resonance in Wireless Telegraph Circuits, *G. W. Pierce;* Longitudinal Vibrations Analogous to those of a Violin String, *H. N. Davis;* Magnetic and Electric Deflection of the α-rays from Radium, *E. Rutherford;* Some Properties of the α-rays from Radium, *E. Rutherford;* On the Use of Centrifugal Force in Soil Investigations, *L. J. Briggs;* An Electrically Controlled Thermostat Operable at Room Temperatures, *L. J. Briggs;* An Attempt to Explain the Cause of the Pressure-Shift and the Broadening of Spectrum Lines, *W. J. Humphreys;* The Mount Weather Research Observatory, *W. J. Humphreys* 80

CXX. MARCH, 1906

On the Conditions for Sparking at the Break of an Inductive Circuit. J. C. HUBBARD 129
Experiments on Resonance in Wireless Telegraph Circuits. Part IV. GEORGE W. PIERCE. 159
The Effect of Pressure on Surface Tension. C J. LYNDE 181
Proceedings of the American Physical Society. The Adjustment of the d'Arsonval Galvanometer for Ballistic Work, *Frank Wenner* 192

CXXI. APRIL, 1906

The Phenomena of Ionization in Flame Gases and Vapors. F. L. TUFTS . . . 193
Conductivity of Vapor from the Mercury Arc. C. D. CHILD 221
The Electrical Production of Ozone. ARTHUR W. EWELL 232
American Physical Society. Minutes of the Thirty-first Meeting; Treasurer's Report; Thermoelectric Heterogeneity in Certain Alloys, especially German-Silver; *E. H. Hall, L. L. Campbell and S. B. Serviss;* The Optical Properties of Car-

303508

bon, *Herbert A. Clark;* Methods of Soil Hygrometry, *E. Buckingham;* A Direct-Recording Magnetic Declinometer, *W. G. Cady;* A Machine for Compounding Sine Curves, *W. G. Cady;* Damping of a Ballistic Galvanometer, *Arthur W. Smith;* Temperature Records of Nocturnal Radiation, *H. T. Barnes;* The Radio-activity of Thorium, *H. M. Dadourian;* The Nucleation and Ionization of Carbon Dioxide and Coal Gas, *Carl Barus.* 245

New Books: *Schmidt:* Kathodenstrahlen; *von Geitler:* Elektromagnatische Schwingungen und Wellen; *von Aufsess:* Physikalische Eigenschaften der Seen; *Boltzmann:* Populäre Schriften; *Righi:* Moderne Theorie der physikalischen Erscheinungen: La theorie moderne des phénomènes physiques . 253

CXXII. MAY, 1906

The Freezing of Pure Liquids and Solutions under Various Kinds of Positive and Negative Pressure and the Similarity between Osmotic and Negative Pressure. C. S. HUDSON 257

On Optical Rotation. HEBERT M. REESE 265

Studies in Luminescence—VI. The Decay of Phosphorescence in Sidot Blende. EDW. L. NICHOLS AND ERNEST MERRITT 279

A Method of Calibrating Gas Meters. FRANCIS GANO BENEDICT. 294

On the Geyser in Atami, Japan. K. HONDA AND T. TERADA 300

On an Emission of Negatively Charged Particles Produced by Canal Rays. L. W. AUSTIN 312

American Physical Society. On the Relative Proportion of the Total Alpha-Ray Activity of Radioactive Minerals Due to the Separate Constituents; *B. B. Boltwood* 320

CXXIII. JUNE, 1906

Mercurous Sulphate and the Standard Cells. G. A. HULETT. 321

Improvements in the Diffraction Process of Color Photography. HERBERT E. IVES 339

On the Measurement of the Index of Refraction by the Interferometer. JOHN C. SHEDD AND PHILIP FITCH 345

Concerning the Temperature of the Nernst Lamp. LEON W. HARTMAN . . . 351

American Physical Society. Minutes of the Thirty-second Meeting; Note on a New Form of Radiometer, *W. W. Coblentz;* On the Determination of Melting Points by Radiation Methods, *C. W. Waidner and G. K. Burgess;* Cheltenham Magnetic Observatory Registration of Effects from Electric Cars over Twelve Miles Distant, *L. A. Bauer;* A New Potentiometer, *H. B. Brooks;* Selective Reflection in the Infra-red, *A. H. Pfund;* Polarization in the Infra-red, *A. H. Pfund;* Spectral Lines as Light Sources in Polariscopic Measurements, *Frederick Bates;* Electrolytic Wave Detector, *L. W. Austin;* On the Influence of Frequency upon the Self-Inductance of Cylindrical Coils of Any Number of Layers, *J. G. Coffin;* On the Geometric Mean Distances of Square Areas, and their Use in the Calculation of Self and Mutual Inductances, *Edward B. Rosa;* Mica Condensers as Standards of Capacity, *E. B. Rosa and F. W. Grover;* The Ratio of the Electromagnetic and Electrostatic Units, *E. B. Rosa and N. E. Dorsey;* Water of Crystallization and Water of Constitution, *W. W. Coblentz;* Some Properties of the Moving Coil Galvanometer, *Walter P. White;* The Constancy of Platinum Thermoelements, and other Thermoelement Problems, *Walter P. White.* 357
